

Quality Assurance

As part of TWMS' continuing commitment to provide quality products and services, all TWMS staff, including any subcontractors that we may be required to utilize, are comprehensively trained to deploy the Time Wise Solutions® methodology. It is mandatory that each person attend a full curriculum of training at a Time Wise Institute® and, after participating in a robust program of training and train-the-trainer, is mentored and certified by one or more of our most senior project management and facilitation staff. We ensure seamless and consistent training and delivery across any size enterprise or region.

Quality Assurance Point of Contact:

Terry Shehata, Ph.D.
